

Since VEKAdeck™ is made from 100% PVC and color stabilizers, this premium deck board will not discolor due to normal weather conditions. Gradual, uniform color change may occur and is normal, but VEKAdeck™ will maintain its attractive appearance season after season.

Our reinforced cellular PVC extrusion process gives VEKAdeck™ dimensional stability and impact resistance. We are so sure of our process that we warrant VEKAdeck™ for 20 years not to rot, chip, peel, blister or corrode.

Our 100% vinyl compound is resistant to ultra-violet, salt spray and humidity, this makes VEKAdeck an ideal material for docks, piers and other marine applications.

Almond

White

Tan

Gray

Khaki

VEKAdeck™ is an engineered deck board that meets or exceeds ASTM standards for impact and puncture resistance, provides excellent traction when wet or dry and is thermally reflective to keep you cool under foot.

VEKAdeck™ and matching fascia board ships in five attractive colors (gray, khaki, tan, white and almond) to satisfy most applications. The product's low water absorption property makes it ideal for high humidity, pool or marine environments.

Maintenance is simply reduced to periodic cleaning with mild household soaps. Standing water should be removed to prevent mold, mildew and dirt build up.

Impervious to salt water and chlorine make VEKAdeck an ideal material for marine applications.

VEKAdeck™ can be worked with traditional hand or power tools.

VEKAdeck™ surface remains cool and splinter free.

VEKAdeck™

Reinforced Cellular PVC Deck Board from VEKA Innovations

VEKAdeck™, the reinforced cellular PVC deck board from VEKA Innovations, has proven to be the alternative to wood and wood fiber/plastic composite decking materials. Our patent pending PVC formulation is lighter than wood or composite materials but is highly impact resistant. VEKAdeck™ works similarly to other decking products, requiring no special tools or fasteners.

Performance characteristics such as long life, high durability, low maintenance requirements along with a high return on investment and the materials environmentally friendly status make it an ideal board for residential and commercial dock applications.

VEKAdeck™ is the perfect way to add value and beauty to your home.

Features make it the best of the best...the benefits make you the king of all decks

Color Fast - 100% PVC and color stabilizers, ensure that VEKAdeck will not discolor under normal conditions.

Insect Resistant - 100% PVC, is impervious to insect damage.

Splinter Proof - PVC compound will not splinter, flake or peel.

Light Weight - Cellular extrusion process makes VEKAdeck™ easier to handle than wood and plastic composite materials.

Slip Resistant - Attractive embossed wood grain anti-skid surface, makes VEKAdeck™ slip resistant when wet or dry.

Impact Resistant - PVC formulated with impact modifiers, meets or exceeds ASTM Standards for breaks and punctures.

Fire Resistant - VEKAdeck™ will self extinguish in the event of fire.

Low Maintenance - VEKAdeck™ never needs painting or sealing.

Easy to Work - VEKAdeck™ works as easily as wood using standard hand and power tools.

Easily Fastened - VEKAdeck™ easily accepts nails, deck screws or hidden fasteners (stainless steel recommended).

Dimensionally Stable - Patent pending reinforced cellular PVC compound has a low expansion and contraction rate that allows for end to end butt joints.

Easy to Clean - Impervious to the most common environmental contaminants, VEKAdeck™ cleans with mild soap and water.

Environmentally Friendly - PVC is recyclable and saves our precious forest resources. Because VEKAdeck™ is UV and water resistant, chemical treatments are not necessary.

Water Resistant - PVC will not absorb moisture making VEKAdeck™ ideal for high humidity or marine areas.
